Remove all laser film on the grill. This is a peel-able plastic left on to protect your grill from scratches during manufacturing and transit. Remove all laser film and laser etch lines with the included stainless steel wipes, WD40, or olive oil. Once a grill has been heated up it is very difficult to remove this film, be sure to check your grill thoroughly before first burn.

Place both shelf tops face down. The shelf tops are symmetric and can be used for either side. The brackets are required to be assembled as shown. Use 2x #10 Screw SS (12) for the cord wrap fastening, use the #10 Screw BLK (11) for the brackets and tool holder.

4: Attach the left and right shelf, and the legs to the grill body with the included 3/8" Shelf and Leg Bolts (9) as shown. NOTE: This bolt passes through the shelf bracket, through the grill body, and into the nuts located in each leg. Each leg gets 2 bolts.
